

Magnetic Stirrer

Magnetic stirrer is an instrument for liquid mixing, mainly used for liquid reagent configuration, stirring low viscosity liquid or solid-liquid mixture; MS-150 magnetic stirrer has a large stirring volume, stable rotor rotation, no jumping sub, and its shell is molded by flame retardant reinforced plastic as a whole, fully enclosed waterproof and rustproof.

Cat.No	MS-150
Speed	2200RPM
Frequency	Speed Regulation Mode
Power Output	6.6W
Ambient Temperature	5 ° C-40 °C
G Force	500 x G
Max Load	2 L
Voltage	110V~240V
Dimension (W×D×H)	150*185*78 mm
Net Weight	0.75kg
